## Student feedback provides essential information to support educator practice

**Research indicates that “hope is a better predictor of ongoing [college] enrollment and graduation than [ACT scores].”**

— Shane J. Lopez, Ph. D., Gallup Senior Scientist and author of *Making Hope Happen*

### The Student Experience™ Survey

- In HCPS, the survey is being provided for all teachers K-12.
- Taken online through a computer or handheld device in less than 15 minutes, preserving valuable instructional time.
- Timely, actionable feedback for educators at the classroom level.
- Important complement to existing measures.

Battelle for Kids

Hillsborough County Public Schools is excited to offer The Student Experience™ Survey to help educators get a more complete picture of the overall student learning experience. Developed by Battelle for Kids, in collaboration with Gallup, the survey captures student feedback at the classroom level around these key themes:

- **Classroom Hope:** The ideas and energy students have for the future.
- **Classroom Engagement:** Students' involvement in and enthusiasm for learning.
- **Classroom Belonging:** Students feel cared for and respected.
- **Classroom Management:** A classroom that is conducive to learning.
- **Classroom Rigor:** Students believe they are learning at challenging levels.

To provide teachers with essential, reliable, and timely feedback, The Student Experience Survey can be administered multiple times during the school year. Formative reports are provided as a tool for teachers to personally reflect and grow as they consider their own professional learning goals. **The reports are not made available to building or district administrators in Hillsborough County Public Schools.** Results can be used formatively and are made **available to the classroom teacher only.**

Survey items are based on years of Gallup research around hope and engagement. The items also measure educator standards for creating a classroom environment that fosters learning and student well-being.

**The value of capturing student feedback is that teachers are able to deepen their understanding about how students perceive their learning environments.**
