

ATHLETIC FIELD GRADING AND SODDING REQUIREMENTS

DOCUMENT NUMBER: 02400

APPLICATION: HIGH SCHOOL

DATE OF ISSUE:

01-18-02 - First issued

NOTES:

Comply with the following requirements for grading and sodding of athletic fields (this refers to Baseball, Softball and Football fields at High School only). Refer to the project Ed Spec for other requirements. Project Architect is to obtain the standard drawings for athletic fields from the HCSB project coordinator.

Grading

All athletic fields are to be laser graded.
Fields are to be re-graded after irrigation is installed.
Remove fill to 6" below finish grade for clay installation.

Sodding

Provide Bermuda sod on all fields.
Apply starter fertilizer.
Lay roll-type sod, removing the shaping mesh as the sod is placed.
Sod is to be compacted with roller.
Sod is to be watered daily for 45 days.
Top dress fields with "greens mix" sand, applied with machine.
Reset all irrigation heads after sodding.
Install communication lines prior to sodding.

Clay

Clay is to be pulverized and free of morrow, as supplied by Standard Sand, Davenport, FL.
